

# MAP E - 4

## FEMA Flood Plain Interpretation

Town of Tainter  
Dunn County, Wisconsin

### Legend

 Approximate Flood Plain\*

Approximately 1,525 acres are contained within this zone. (Not including the open water shown in blue).

\* The shown flood plain is a digitized polygon dataset obtained from the West Central Regional Planning Commission. The boundaries are derived from the FEMA flood plain FIRM's dated October 15th 1981. This map is not intended to act as an exclusive determiner, whether a parcel is in or out of the flood zone. Also note that the FEMA, in conjunction with the Wi. DNR, will be releasing an updated flood plain study, County wide, in the Fall of 2009.
